

Taster Sessions in Cyber Security, Intellectual Property (IP), Data and Artificial Intelligence (AI)

These sessions are designed to give you clear, expert legal guidance and to assess your digital readiness, helping you understand crucial areas of concern and kickstarting your journey to compliance and security.

In a time of rapid digital evolution, businesses face growing regulatory pressure and increasing risk. We offer a practical starting point to help you avoid operational disruption, financial penalties, and reputational damage.

At the end of this session, we will perform a tailored gap analysis which will assess where your business currently stands in its IP, cyber security, data and AI readiness journey.

What's included?

On site visit from our experts

We'll help you establish a foundation in legal compliance and risk for your cybersecurity, data protection and AI and help you understand what you need to do to protect your valuable intellectual property and information assets.

Expert legal insight

Hear from our specialist legal experts on how to protect your business in today's digital world.

Readiness checklist

Our experts will work with you to complete a checklist to gauge your readiness with regards to IP, data protection, cybersecurity and deploying AI in your business.

Roadmap to AI implementation

An easy-to-understand roadmap that highlights risks for your business and provides clear steps to help you prepare for AI while protecting your data and systems.

Snapshot gap analysis

A report that highlights any gaps, identifies risks and provides clear steps to help your business comply with its legal obligations while keeping your systems secure (Half day workshop only).

Why choose Anderson Strathern?

Our team is one of the largest and most experienced cross-disciplinary teams in Scotland, with experts in all aspects of intellectual property (IP), data protection, freedom of information, cybersecurity and artificial intelligence.

Our team brings together specialist leaders in the field who have outstanding experience in these areas, in both non-contentious and contentious matters.

Anderson Strathern is one of only a handful of law firms appointed to the Legal Incident Response Panel of Cyber & Fraud Scotland and our Partner, Douglas McLachlan, has led his team in advising a range of public and private sector bodies that have suffered significant cyber breaches.

Our strength in UK GDPR and data protection sets us apart from the competition.

"Now is the time for businesses and organisations of all sizes to look closely at how you can protect your valuable intellectual property and information assets, understand how to deploy AI in your operations and also ensure that you know what to do if you are hit by a cyber attack.

This session offers a practical starting point to help you avoid operational disruption, financial penalties, and significant reputational damage."
